PROFESSIONAL SUMMARY

Full-Stack Software Engineer with expertise across modern technology ecosystems. Skilled in designing and developing robust backend solutions using Java Spring Boot, Python/Django, and Node.js microservices, as well as building responsive user interfaces with React and Next.js. Experienced in business analysis, complex system coordination, and AI model implementation, transforming functional requirements into scalable, secure, and high-performance applications.

PROFESSIONAL EXPERIENCE

Full-Stack Software Engineer / IT Lead – ChronoDiali Mar 2026 – Present

- **Architected and maintained logistics systems** for e-commerce shipment management in Morocco.
- **Developed internal tools** using **Next.js** and **Node.js/Python microservices** to automate repetitive tasks, reducing manual errors by 40%.
- **Led technical integrations** and managed the full engineering lifecycle, from business requirements analysis to deployment and continuous optimization.

Software Engineering Intern – Abalsia Consulting Mar 2025 – Sep 2025

- **Backend security development (Python/Django):** Implemented Microsoft SSO, MFA authentication, and brute-force protection mechanisms for secure APIs.
- **Real-time API implementation:** Developed a **GTFS-RT** module using Protocol Buffers and Python for structured transportation data tracking.
- **Modern frontend development:** Built modular and responsive interfaces using **Next.js**, **Material UI**, and **Zustand**, following Agile/Scrum practices.

Software Engineering Intern – Maghreb Rayonnage Jul 2024 – Aug 2024

- **Document automation (Next.js/Node.js):** Developed a web application for the automatic generation of **Technical Specifications Documents (CPS)**.
- Streamlined complex reporting processes, reducing delivery times and minimizing human errors through automation.

Freelance Full-Stack Developer – WebMorphers Agency Sep 2023 – Jul 2025

- Managed the complete software development lifecycle, from client requirements gathering and solution design to the delivery of scalable web and mobile applications.
- Worked with multiple technology stacks including JavaScript, Python, and Java.

PROJECTS

AI-Powered Skin Analysis Application <https://app.glamflow.ma>

Trained and deployed Deep Learning models for skin condition detection and classification. Developed a complete AI-powered platform integrating computer vision and modern web technologies. **Technologies:** Python, Flask, FastAPI, Next.js, Vercel, YOLOv11, Docker, Supabase

Microservices E-Commerce Platform github.com/somoncef/EcommerceMicroServices

Designed and implemented a complete microservices architecture for order management, product catalog management, and secure payment processing. Built transactional services using **Spring Boot** and integrated them with a React frontend. **Technologies:** Spring Boot, Java, Node.js, React, PostgreSQL, Docker, REST APIs

HACKATHON PROJECTS

Smart Cities – Public Lighting Monitoring github.com/somoncef/Smart-city-Gestion-Materielle

Developed a mobile application and an administration dashboard with real-time monitoring through Firebase, integrating simulated and real IoT data streams. **Technologies:** Java Mobile, Next.js, Firebase, YOLOv8

Radiology Vision AI – IEHF Hackathon 2024

Built an AI platform for medical image super-resolution and artifact detection. Focused on backend AI integration using TensorFlow and modern API frameworks. **Technologies:** CNN, Autoencoder, TensorFlow, Flask, FastAPI, Python, Next.js

EDUCATION

- 2022–2025 Engineering Degree in Computer Science and Networks (MIAGE) | **Moroccan School of Engineering Sciences (EMSI)**
- 2021–2022 Bachelor's Degree in Software Development | **Faculty of Sciences Ain Chock**
- 2019–2021 Specialized Technician Diploma in Software Development | **OFPPT NTIC1, Casablanca**

SKILLS

Programming Languages	Java (JEE, Spring Boot), Python (Flask, Django), TypeScript/JavaScript (Node.js), C#, Dart, SQL / PL-SQL
Frameworks	Spring Boot, React.js, Next.js, Django REST Framework, Express.js, Angular, Flutter, JUnit, Mockito, REST API Design
Databases	PostgreSQL, MySQL, SQL Server, MongoDB, Redis, SQL Optimization, Database Design
AI Coding Tools	GitHub Copilot, Cursor, Claude Code, Ollama, OpenAI APIs
AI / Data Science	Pandas, Scikit-learn, TensorFlow, PyTorch, YOLOv11, OpenCV, CNNs
DevOps & Tools	Agile, Scrum, Docker, Kubernetes, Kafka, Git, Jira, Azure DevOps, CI/CD, Postman
Soft Skills	Adaptability, Teamwork, Problem Solving, Autonomy, Analytical Thinking

ADDITIONAL INFORMATION

- Certifications** Introduction to Git/GitHub (Google, 2024), React Fundamentals (Meta, 2024), Java OOP (University of Pennsylvania, 2024), Python for Everybody (University of Michigan, 2023)
- Interests** Fitness, Strength Training, Video Games
